

Amie L. Peterson, MD is a neurology fellow at Oregon Health Sciences University in Portland, Oregon. She completed her medical school training at the Medical College of Georgia and her neurology residency at Brown University in Providence Rhode Island. She also did a year of a clinically base movement disorders fellowship and U Mass Medical Center. Since starting her fellowship in Oregon she has been active both with clinical work and clinical research. Her research focus is on gait and balance problems in Parkinson's disease. She is specifically looking at vitamin D as a novel therapy to improve balance in Parkinson's disease. In addition Dr. Peterson has been involved with legislative advocacy work since early in her residency. She worked in Senator Jack Reed's office as the American Academy of Neurology, the American Neurological Association, and the Child Neurology health policy fellow in 2004. She continues to serve on the American Academy of Neurology's Government Relations Committee and locally on the Advocacy Committee for Parkinson's Resources of Oregon.
